The Department of Mathematics presents
Michelle Rabideau, PhD Candidate, UCONN,
with a talk aimed at students:

THE FIBONACCI SEQUENCE
It’s as easy as 1, 1, 2, 3, ...

Friday, Nov. 10 | 1:30 - 2:30 pm | Dana Hall, D204
Refreshments! All are welcome!

Leonardo of Pisa (Fibonacci) introduced the world to the Fibonacci sequence in 1202. Since that time, mathematicians have been captivated by this simple pattern: 1, 1, 2, 3, 5, 8, 13, 21,... In this talk we will introduce another famous topic in mathematics, continued fractions, and use them as a tool to construct and study the Fibonacci numbers.
